

# NEW YEARS

## Math Craft

# About this file...

This New Year's disco ball activity is perfect for reviewing telling time during the month of January or throughout the year. Each page is labeled at the top with what is on the page. Students will draw the time on their analog clock (disco ball) or use the provided clock hands and write the matching digital time. You can have students create their own time or assign a time to them.

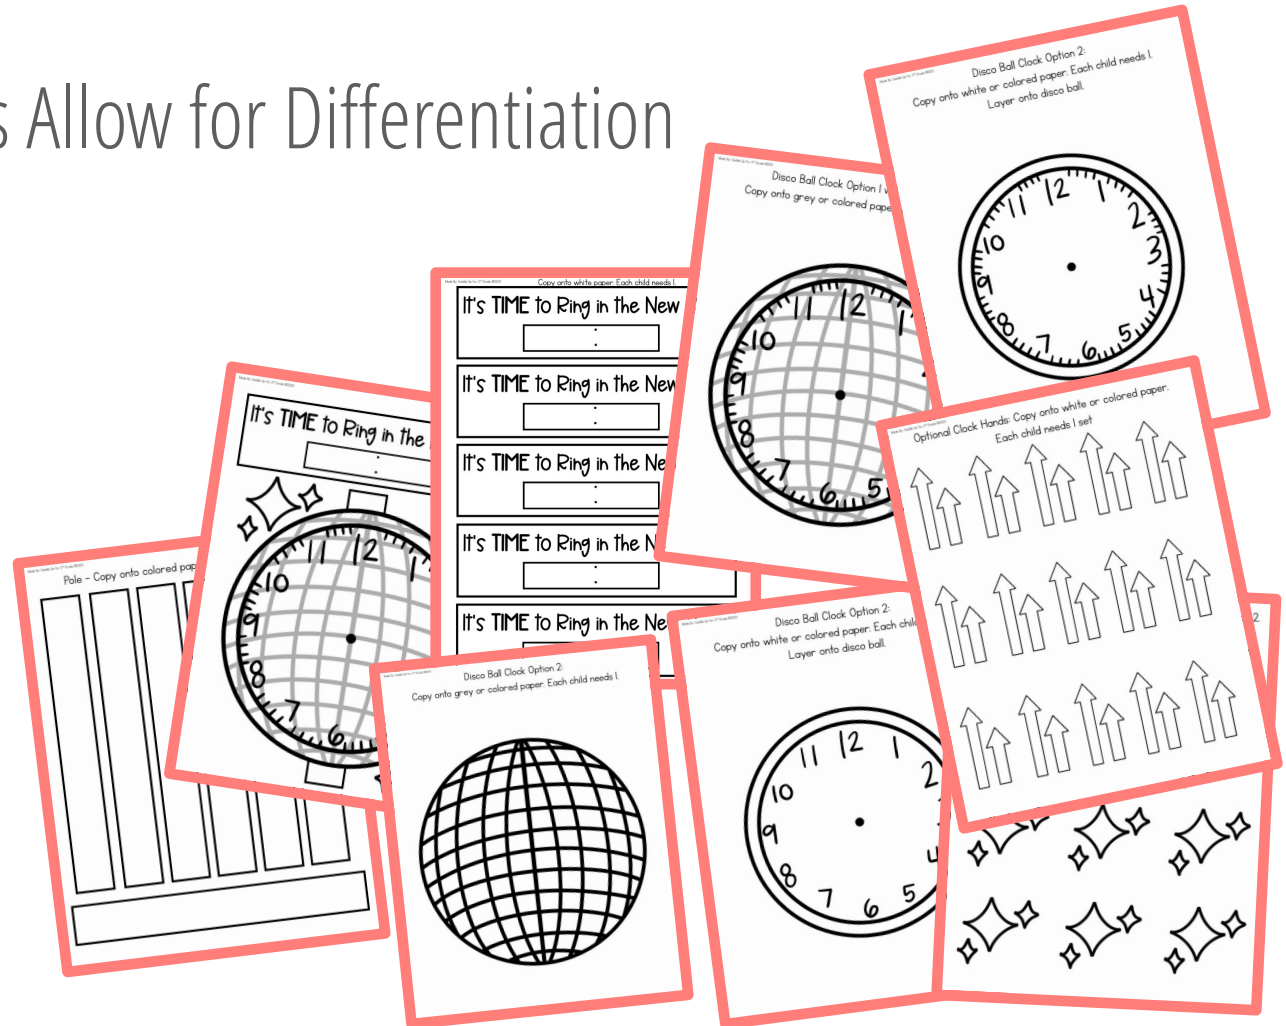

## Directions:

1. Print templates onto colored paper.
2. Students will draw a time on their analog clock (the disco ball) and write the digital time that matches.
3. Cut out the pieces. Glue the disco ball pieces together onto construction paper. I recommend showing them how to lay them out on the paper first before gluing.

# Templates

- ✓ 3 Different Disco Clock Templates
- ✓ Blank Clocks Allow for Differentiation
- ✓ Low Prep
- ✓ Easy to Cut

# More Info...

- ✓ Perfect for Review
- ✓ Easy and Low-Prep Craft
- ✓ Use for a Hallway Display
